

An illustration showing a large number of bathtubs arranged in a grid that recedes into the distance, creating a sense of depth. In the foreground, a single bathtub is shown with a faucet and is labeled "270 LITRES". The entire illustration is enclosed in a red dashed border.

Annually, the volume of rain that falls on an average 1/4 Acre Lot (615 mm annual rainfall) could fill 2300 bathtubs .
