

WARNING

Water Recreation Users:

A siren indicating water discharge from the BC Hydro powerhouse may occur at any time. This discharge may cause strong currents at the river mouth. If you hear the siren, be aware that strong currents may be present at the river mouth.

For Your Safety:

- Always check the river current and surf current before going out
- Use a buddy system and be mindful of your location at all times
- If you are caught in a current, do not attempt to paddle against the current. Paddle parallel with the shore until out of the current and then paddle or catch a wave to shore.
