## Residual Solids Conveyance Line: Marigold Road

As part of the Wastewater Treatment Project, Knappett Projects Inc. will be installing a pipe along Interurban Road from the intersection at Grange Road, across the Colquitz River, to the Marigold Pump Station. This work is anticipated to start the week of August 19<sup>th</sup> and is expected to take approximately one month to complete. There will also be construction activities at the Marigold Pump Station to connect the new pipe to the facility.

### What to Expect

- The pipe will be installed in segments.
- A trench will be excavated, the pipe will be installed, and the trench will be backfilled. The surface will be temporarily restored at the end of each work day.
- Final restoration will take place after each section has been tested and completed.
- Rock encountered in the trench will be removed by blasting or mechanical means.
- The Colquitz River crossing includes a fish salvage, installation of coffer dams and dewatering.
- Noise associated with this work includes excavation machinery and truck back-up beepers.
- Pipes and equipment will be temporarily stored in the area while this work is completed.

### Work Hours

- Monday to Friday from 7:00 a.m. to 7:00 p.m.
- Occasional Saturday work may be required from 7:00 a.m. to 7:00 p.m.

### Traffic Impacts

- There will be single lane alternating traffic in the work zones controlled by flaggers.
- Contractor will schedule work to try to minimize any traffic impact along the work site.
- There will be periodic closures of the Colquitz River Trail with a detour in place.

### Access

- Vehicle access to residences will be temporarily restricted when work is underway and will be reinstated at the end of each work day. Residents will be notified of temporary closures in advance.

Thank you for your patience as this work is completed.

### Background

Construction of the Residual Solids Conveyance Line includes two pipes and three small pump stations. The first pipe will convey residual solids from the McLoughlin Point Wastewater Treatment Plant to the Residuals Treatment Facility at Hartland Landfill for treatment. The second pipe will return the liquid removed from the residual solids during the treatment process to the Marigold Pump Station, from where it will be returned to the McLoughlin Point Wastewater Treatment Plant through the existing conveyance system.
